### *Who was Remington?*

**Frederic Remington loved the Old American West** — A prolific artist, he loved every thing about it from the native Americans who were always here to the cattlemen, cowboys, and miners, to the landscape. No one really knows how many paintings Mr. Remington did during his lifetime, but it is, perhaps, the most complete visual log of the American West as it was in the late 19th century. The Bridges of Montrose Golf Club is proud to pay tribute to Remington's genius with a restaurant that offers a magnificent view of the landscape he loved so much. Our clubhouse is adorned with reproductions of several of Mr. Remington's works, we hope you enjoy viewing them.
